thermo-electra
temperature sensor solutions

PR
electronics

Our purpose

is to create market-leading site standard solutions with high signal integrity and simplicity for our customers, concentrating on innovation in six core business areas: Temperature, I.S. Interfaces, Communication Interfaces, Multifunctional, Isolation and Display.

Our products are individually outstanding, but when our point-to-point temperature measurement devices, I.S. interfaces, backplanes, multifunctional signal devices and future-proof communication interfaces are combined, our solutions are truly unrivalled.

We will be

our customer's trusted partner for the best and most innovative signal conditioning solutions in the process and factory automation industries.

We provide

a wide range of benefits to our customers through innovative solutions and close collaboration:

- The highest signal integrity from your measurement point to control system
- Maximum uptime based on our Install and Forget® philosophy
- Easy and cost-effective deployment and monitoring with intuitive communication interfaces
- Site standard devices that are easily programmable to suit your specific application
- Day-to-day delivery

Since 1974, we have been dedicated to perfecting our core competence of innovating high precision technology with low power consumption. With a dedicated R&D center that is integrated with our lean production facility at our headquarters in Denmark, we are today one of the leading companies within signal conditioning.

Supply voltage, universal AC / DC	21.6...253 V / 19.2...300 V		
Supply voltage, DC	12 or 24 VDC	19.2...28.8 VDC	19.2...28.8 VDC
Max. required power	2.2 W	1.5 W DC / 2 W, UNI	2.2 W / max. 7.2 W
Isolation voltage, test / operation		3.75 KVAC / 250 VAC	
Response time	< 75 ms	250 ms...60 s	60 ms...999 s
Signal dynamics, input / output	12 bit / -	16 bit / -	17 bit / 16 bit
Setpoint adjustment / repetition		0.1% / 0.1%	
Delay / hysteresis		0...99.9 s / 0...99.9%	
Temperature coefficient	< ±0.01% of span / °C	< ±0.01% of span / °C	< ±0.01% of span / °C
Channels	1 or 2 outputs	1 input, 2 relays	1
Programming	Switch / front keys	Switch / front keys	Switch / front keys

TYPE	2255	2279				
INPUT, DC: Frequency, pulse	f/I - f/f converter	AC / DC transmitter				
INPUT, AC: A, V						
OUTPUT: mA, V, relays, pulse						

INPUT: PV / SP

A, AC measurement range / min. span		0...1 ARMS / 0.5 ARMS				
V, AC measurement range / min. span		0...250 VRMS/0.5 VRMS				
Max. offset		50% of selec. max. value				
Sensor type	All standard sensors $\perp\!\!\!\perp$					
Hz, measurement range / min. span	0...20 kHz / 0.001 Hz					
Min. pulse width	25 μ s					
Sensor supply	5...15 VDC					
OUTPUT:						
mA, signal range / min. span	0...20 mA / 5 mA	0...20 mA / 4 mA				
V, signal range / min. span	0...10 VDC / 0.25 VDC	0...10 VDC / 0.2 VDC				
Max. offset	50% of selec. max. value	20% of selec. max. value				
Load (@ current output)	\leq 600 Ω	600 Ω				
Pulse output	NPN					
Max. output frequency	1000 Hz					
Relays	1 x SPDT, AC: 300 VA					
Display, digit / type	3-digit / LED					

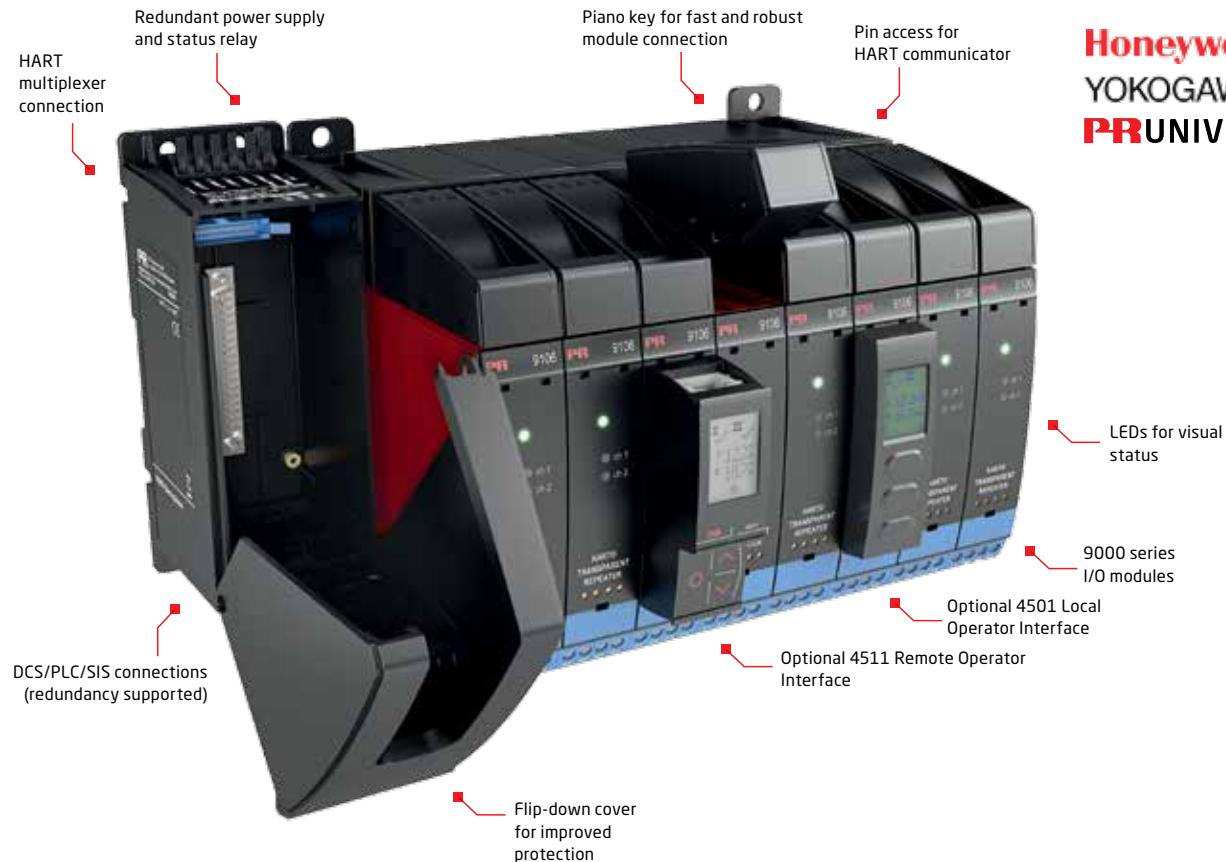

TECHNICAL SPECIFICATIONS:

Ambient temperature	-20...+60°C	-20...+60°C					
Supply voltage, universal AC / DC		21.6...253V / 19.2...300V					
Supply voltage, DC	19.2...28.8 VDC	19.2...28.8 VDC					
Max. required power	2.4 W	1.3 W / 2.2 W, UNI					
Isolation voltage, test / operation	1.4 kVAC / 150 VAC	3.75 kVAC / 250 VAC					
Response time	60 ms...999 s	< 1.5 s					
Signal dynamics, input / output	- / 16 bit	Analog signal chain					
Accuracy							
Temperature coefficient	< ±0.01% of span / °C	< ±0.01% of span / °C					
Channels	1	1					
Programming	Switch / front keys	Switch

SOFTWARE

5909 LOOP LINK

Display / programming front 4501

Communications interface with front keys for modification of operational parameters in the 4000 and 9000 series. The scrolling help text in the display is available in 7 languages and guides the user effortlessly through all the configuration steps. The 4501 is easily moved from one device to another whereby the configuration can be copied to other devices of the same type. When mounted in the process, the 4501 displays process data and device status.

Communication enabler 4511

Wired or wireless, locally or remotely, analog and digital, this advanced device enables easy and cost-effective access to your process values from your existing 4000 and 9000 devices. You can manage processes onsite, connect to Modbus RTU devices, connect to any major communication protocols via gateway or remotely using the PR Process Supervisor (PPS) app. The 4511 offers the same advantages as the 4501 with the added feature of digital communication.

ConfigMate 4590

The 4590 is an adapter unit for the display / programming front 4501. It is used to program the 3114 and connect to this device with a jack plug. The 4590 is battery-driven or driven by the USB port of the PC. It can be used both for programming and as a diagnostic tool to display process parameters, when the 4501 is mounted. The 4590 is easily moved from one device to another.

PReset

PReset is an easy-to-use menu-driven software program for set-up of PR products via a standard PC and a programming interface. PReset gives a high degree of flexibility for each product and when the menus are completed, the data is transmitted to the unit which is then ready for operation.

Loop Link 5909

Loop Link 5909 is a USB communications interface for configuration and monitoring of PR electronics' PC-programmable devices. PR devices available in the configuration program PReset ver. 5.0 or higher, can be programmed by way of Loop Link 5909.

POWER RAIL

The data sheet specifies the maximum required power at nominal operating values, e.g. 24 V supply voltage, 60°C ambient temperature, 600 Ω load, and 20 mA output current.

In typical applications, the devices are not running at worst-case conditions, specifically when many devices are located together. For engineering purposes, 70% (P70%) of maximum required power is often used.

3000 power rail

The number of 3000 devices that can be powered from different power sources is listed in the table below:

	Using a PR converter device as power feed-in	3405 power feed-in	9410 power feed-in
P70%	Up to 25 devices	Up to 160 devices	Up to 250 devices
P100%	Up to 18 devices	Up to 115 devices	Up to 184 devices

The devices can be stacked vertically or horizontally.

**9000 power rail**

The number of 9000 devices that can be powered from the 9400 power sources is listed in the table below:

	9410 power feed-in
P70%	Up to 150 devices
P100%	Up to 120 devices

Benefit today from ***PERFORMANCE MADE SMARTER***

PR electronics is the leading technology company specialized in making industrial process control safer, more reliable and more efficient. Since 1974, we have been dedicated to perfecting our core competence of innovating high precision technology with low power consumption. This dedication continues to set new standards for products communicating, monitoring and connecting our customers' process measurement points to their process control systems.

Our innovative, patented technologies are derived from our expansive R&D facilities and from having a great understanding of our customers' needs and processes. We are guided by principles of simplicity, focus, courage and excellence, enabling some of the world's greatest companies to achieve PERFORMANCE MADE SMARTER.
