CHEMICAL RESISTANCE DATA

- All recommendations assume ambient temperatures 20°C / 68 °F, unless otherwise noted.
- These recommendations are based upon information from material suppliers / manufacturers and careful examination of available published information and are believed to be accurate.
- The ratings for these materials are based upon the chemical resistance only.
- However, since the resistance can be affected by concentration, temperature, presence of other chemicals and other factors, this information should be considered as a general guide and never as an unqualified guarantee.
- Added consideration must be given to switch selections when the medium is abrasive, viscosity is to be accounted for, permeating properties, has tendency to clogging , etc.
- Wetted parts are not guaranteed against corrosion or permeation since processes vary from plant to plant and concentration of harmful fluids, gasses or solids vary from time to time in a given process.

Empirical experience by users should be the final guide to determine the suitability and use

Notes:

- Teflon, Kalrez and Viton are ® registered trademarks of DuPont corporation
- Hastelloy C is a ® registered trademark of Haynes International
- Monel is a ® registered trademark of Special metals

All trademarks and/or trade names included in this document are the property of the respective owners

RATINGS - CHEMICAL EFFECT

- A - No effect - Excellent
- B - Minor effect - Good
- C - Moderate effect - Fair
- D - Severe effect - Not recommended

FOOTNOTES

1. P.V.C. - Satisfactory to 22° C.(72° F)
2. Polypropylene - Satisfactory to 22° C.(72° F)
3. Polypropylene - Satisfactory to 48° C.(120° F)
4. Buna-N - Satisfactory for "O" Rings
5. Polyacetal - Satisfactory to 22° C.(72° F)
6. Ceramic - Satisfactory to 22° C.(72° F)

thermo-electra

measurement and control technics

Pijnacker The Netherlands

The company was established in 1962 and concentrated on temperature sensor manufacturing. It has grown into a young modern company with expertise for the application required.

Today we offer a complete range, from the temperature sensor and thermowell, to cable and connector systems, including instrumentation and traceable certificates.

All components needed for accuracy and speed are available.

For many applications, sensor design can be discussed with the client, to satisfy his exact requirements.

You can count on our proven experience and knowledge.

Our quality is certified to NEN-EN-ISO 9001

Explosion proof sensors and multipoint assemblies are certified Exe, Eexi or Exd to ATEX .

Purpose built products exactly fitting the applications are one of our strengths and give a major benefit to the end users.

Thermo-Electra offers, together with more than 25 sales channels throughout the world, a reliable production with technical support and service.
