## Declaration of exemption to Waste from Electrical and Electronic Equipment (WEEE)

This document shall serve as a formal declaration that temperature sensors manufactured by Thermo-Electra are not subject to **WEEE** regulations.

Our sensors are defined as components, they do not contain circuit boards or other electronic parts themselves. We therefore are exempted to comply with the notification obligation and contribution to the WEEE.

The fact that we do not have to adhere to the WEEE does not exempt us from our responsibilities to the environmental impact our products have. We work closely with our suppliers and local institutions to reduce our waste and environmental impact from purchasing to production to transportation, and we encourage our customers and their end-users to do the same.

Signed
