Subject: REACH

Dear Customer,

Thermo-electra B.V. is aware of EU's regulation 1907/2006, concerning Registration, Evaluation and Authorization of Chemicals (REACH) and Appendices to Annex XVII to Regulation No 1907/2006 as regards CMR substances and we will continuously work to ensure our compliance with this legislation.

We have identified us as a downstream user as we produce temperature sensors and do not manufacture or distribute any chemicals. This means we did not need to pre-register our products.

Our policy is to be fully compliant with the new law and to work closely with our suppliers and customers to this end. This letter is part of our policy of keeping our costumers fully informed about our REACH progress. We have contacted all of our downstream suppliers and they either have:

- * Confirmed the goods supplied are exempt from the REACH standard.
- * Confirmed that any substance on their own, and/or substances in preparations and/or all substances intentionally released from particles are registered

The candidate list was updated on 30-04-2019 and now contains a total of 197 Substances of Very High Concern (SVHC)

(source: <https://echa.europa.eu/nl/candidate-list-table>)

All safety data sheets will be revised to include the requirements of REACH if necessary. Thermo-electra B.V. can confirm that the supply of SVHC will not be applicable to the goods supplied to your organization.
